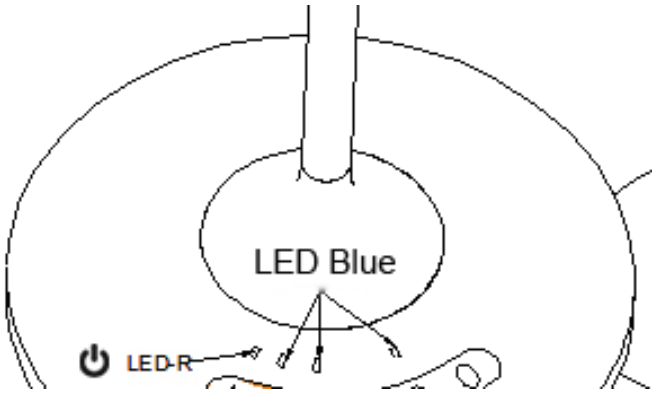
OPERATING INSTRUCTIONS

Function of table lamp ON/OFF

ON:

- Switch to the middle “light bulb” on the button, 33040 will apply to the table lamp function. In addition, the LED indicator lights (below picture) and the table lamp will light-up for 2 seconds at the same time, and then the lights off.



OFF:

- Please do a long pressing the on/off key for 1~2 seconds to turn off.

Charging

- When 33040 is out of battery, the indicator light and table lamp will not shine. If this situation occurs, please put 5V power supply cord to DC charging port for charging (Diagram 2). The red light will start flashing during the charging process.
- The red light will shine for a while after charging is completed. You can press on/off key to start the table lamp while it’s shining.

Controlling White Light of Table Lamp

There are 2 blue LED lights as indicators to present controlling the brightness of white light. By sliding the touch panel area, the first blue LED light will be adjusted as medium light, and then the second blue LED light will be stronger light.

Controlling Different Colors of LED Mood Light

For the symbols of controlling color gradients, changing colors of light is from left to right by sliding the touch panel area.

In the beginning, touch the “mode key”, the LED lights will be switched into the state of automatic mode, which can be adjusted into favorite color on the automatic status by sliding on the touch area. (Diagram 1)

Function of BLUETOOTH®

There is a sound indication when the device is switched to BLUETOOTH® mode. Then a pairing name of 33040 would be shown on the smart devices such as mobile phone or tablet PCs.

Attention

1. Please charge the product before use. Do not charge while using BLUETOOTH® status. In this state, the charging time will be extended.
2. Please do not place the product close to the fire or water to avoid unnecessary accidents
3. Please charge fully, if it doesn't use for a long time. Keep the product in a dry place, and charge it once every 3 months
4. Please do not touch more than two functional keys, which is easily to get freeze or stop responding
5. It needs at least 1 second to respond each operation. If touch/press sliding area too fast, some errors may occur
6. When the product is abnormal, please press power button more than 3 seconds and then re-charge it
